

CLEAN AWAY COVID
thoroughly and often.

Clean your surfaces to **reduce + remove** germs.

Easy and effective cleaning takes only a few steps.

First, pull out your essential cleaning supplies — microfiber cloths and soap and water or an all-purpose cleaner. With gloved hands, spray the soap or cleaner on the surface and scrub using a clean microfiber cloth to loosen and remove grime, dirt and germs. Use the clean side of your cloth to wipe away the surface. As you clean each new surface, make sure you use a fresh microfiber cloth. When you are finished, wash the dirty cloths separately in the washing machine in hot water and detergent. Remove your gloves and wash your hands with soap and water for 20 seconds.

SPREAD THE WORD. NOT THE VIRUS.

Spray it down. Wipe it off. Wash it up. Clean it out.

This catchy refrain will help you remember the proper steps to cleaning your home. To watch the video, [click here](#).

Microfiber cloths are affordable and easily available.

Microfiber cloths are re-usable and can be washed hundreds of times. They are a cleaning super hero that attract dirt, grime and germs and lock them away from your surfaces.
